

- Individual adaptation without modification
- Database tables for easy customizing and control
- Data exchange via standard communication mechanism (RFC)
- Integrated correction module
- Realtime integration

Mr. Kingery (SAP USA, 03/2010): „Best SAP integration of all MES systems“

/FFMES/

- All SAP adapter ABAP objects, database tables, fields, and data elements exist within the registered namespace.
- Conform to SAP standards and conventions.
- No modification of SAP objects and no update of SAP tables.
- Created by using SAP-endorsed technologies such as IDOCs, BAPIs, released function modules, or SAP-provided transactions.
- Uses the **SAP Add-On Assembly Kit (AAK)** to package an ABAP add-on and provides installation by **SAP Add-On Installation Tool (SAINT)**.
